

VOTE AGAINST THE INCINERATOR!

- Halton Borough Council is committed to improving the health and environment of Halton residents. (QUITE RIGHT TOO! Halton is one of the most polluted areas, with one of the worst health records in the UK).
- Halton Borough Council is committed to waste reduction, recycling and reducing global warming. (QUITE RIGHT TOO! However the proposed incinerator will massively increase pollution in Halton, create millions of tons of toxic waste to be dumped at Randle Island, emit some 2,000 tons of CO2 every day and threaten the health of Halton residents).
- WHY, THEN, has Halton Council not objected to the Incinerator? If they had done so, a Public Inquiry was guaranteed.
- THE LIBERAL DEMOCRAT Councillors have publicly called for a Public Inquiry, and written to the Secretary of State requesting it.
- THE CONSERVATIVE Councillors have publicly called for a Public Inquiry, and written to the Secretary of State requesting it.
- NO LABOUR Councillors have publicly called for a Public Inquiry or written to the Secretary of State requesting one.

**YOU can show Halton Borough Council that YOU
are against the Incinerator and want a Public Inquiry!**
